

Strong association for strong competition

Your business model takes center stage
Our network is your strength

The VATM maintains extensive networks in politics, the industry, science and the media, from which you benefit as a member. Our offices in Berlin, Brussels and Cologne put you in touch with decision-makers at both national and European level. VATM also has an excellent network in Washington in the areas of finance, business and regulation.

Competition connects

You will find the right business partners in our association. The VATM unites suppliers and consumers at all levels of the value chain: from infrastructure expansion, network operation, subscriber access and service provision to technology equipment and services in the financial, data, media and consulting segments, as well as companies at the interfaces to the energy and supply sectors

A basic distinction is made between full and associate members.

Full members are telecommunications companies operating in Germany that have their own telecommunications network. The classic carriers such as Vodafone, Telefonica, EWE Tel, 1&1, etc. can become full members.

Associate members can be all companies whose activities focus on the field of telecommunications. Associate members are not entitled to vote or stand for election to the VATM Executive Committee (e.g. at the General Meeting and the election of the Executive Committee).
